

Benefits

Single view of your data

Give self-service access to thousands of trusted analytics-ready datasets.

No-coding Self-Service

Easy to use spreadsheet-style tools with 270 built-in functions empowers any analyst.

Strong yet flexible governance

Integrated security and governance allows democratization with control.

Seamless integration

Integrates with all your data sources, infrastructure and downstream analytics tools.

Results You'll See

- 3x Faster Analytics Prep Cycles
- 1000s Of Curated Datasets
- 25x Engineering Efficiency
- 150x Faster Data Analysis

“Datameer’s combination of power, ease and scale has allowed us to empower all of our global business units with self-service data and insights.”

Director of Multi-trillion Dollar Global Investment Management Firm

Datameer X Data Pipelines and DataOps

Datameer X breaks down data silos, gets companies ahead of their data demands, and empowers everyone to discover insights. Without any code, teams can rapidly integrate, transform, discover, and operationalize analytics-ready datasets to their projects.

Datameer X is a unified data preparation, pipeline and dataops platform that is built for a modern agile analytics lifecycle. It combines the power to work with huge volumes of data and complex data formats with easy point and click tools that that can match up to the skillsets of any persona that needs to prepare and explore data.

Get ahead of all your data demands

Datameer lets you transform even the most raw and complex data into analytics-ready datasets in minutes—no more wasted days of engineering time. The code-free platform provides easy to use tools to rapidly blend and curate data. Operationalize workflows and deploy trusted data to hundreds of analytics projects across your enterprise.

Empower everyone to discover insights

With Datameer, you can provide faster access to and get answers to your questions in seconds, not days. You can analyze raw data on-the-fly with an intuitive interface that looks and works like a spreadsheet. Simply load data as-is, apply any lens to it, and start discovering business-changing insights.

Agile Data Prep for Data Science

The new Datameer X release offers powerful point-n-click functions to explore and prepare data in minutes for data science projects. Easy encoding functions expand individual columns into multiple ones ready to feed data science models with a single click and eliminates time-consuming and error-prone complex formulas. New Excel-like Pivot Tables let you explore and aggregate data across billions of rows, hundreds of columns and thousands of variables.

Datameer: Designed for the Enterprise

ENTERPRISE-GRADE PLATFORM

Scalable platform that provides deep security and governance of data assets but also make it continuously flowing to your business teams.

INTEGRATE

Easily integrate volumes of data using built-in connectors to over 70 different data sources and formats.

TRANSFORM

Transform, blend, and enrich with no code in a spreadsheet-like interface with over 270 pre-built data prep functions.

DISCOVER

Analyze raw data on-the-fly in a visual interface. Drill down or scale across your data to see revenue-driving insights.

OPERATIONALIZE

Operationalize the workflow and deploy data sets to data warehouses, BI tools, and data science tools.

POWER

Datameer's unique architecture gives you scalable computer power while abstracting away the complexity.

SCALE

Datameer processes your data natively in your data lake so you don't suffer the latency of having to move your data first.

SIMPLE

Datameer's easy spreadsheet-style transformations puts your data in the hands of analysts without writing any code.

INTEGRATE

Datameer separates storage from compute for dynamic elasticity to scale out jobs on large data sets and reduce compute costs.

TRANSFORM

Easily spin up environments for new workloads and meet every SLA with the power and reliability needed for your most intensive jobs.

DISCOVER

Democratize data while leveraging advanced governance and fine-grained security to keep data secure and private.

About Datameer

Datameer transforms businesses into agile, data-driven organizations by democratizing access to all enterprise data through secure, governed, business data pipelines with Datameer X, and virtual access, search, modeling and collaboration with Neebo. Business and data analysts can immediately prepare and explore even the most complex, dispersed data, and instantly transform it into business consumable information, both on-premises and in the cloud.
